

John Travis Williams Jr.

Cloud Infrastructure & Solutions Architect

Salemburg, NC | 910.502.3332 | john@shotgunninjas.com | linkedin.com/in/shotgunsensei | github.com/shotgunsensei

Professional Summary

Senior infrastructure engineer and systems architect with deep operational experience across healthcare IT, hybrid cloud environments, automation systems, and scalable SaaS platform design. Founder of Shotgun Ninjas Productions and architect of the OperatorOS ecosystem, focused on reducing operational drag through AI-assisted systems, automation, and modular software platforms. Combines enterprise infrastructure expertise with product strategy, technical architecture, and operational scalability.

Technical Stack & Core Technologies

Cloud Architecture, Azure, Hybrid Infrastructure, SaaS, Systems Architecture, Platform Engineering, Technical Strategy, Automation

Professional Experience

Xodus Technology Professionals | Senior Infrastructure & Security Engineer

- Led top-tier escalation support across healthcare, radiology, and MSP-managed environments.
- Administered Microsoft 365, Active Directory, Entra ID, DNS, DHCP, endpoint security, VPNs, and hybrid infrastructure environments.
- Designed and troubleshooted multi-site networking involving VLANs, Metro-E, VPNs, ArubaOS switching, and VoIP systems.
- Developed PowerShell automation and RMM remediation workflows to improve operational consistency and reduce recurring issues.
- Supported HIPAA-regulated radiology workflows including Intelera/InteleViewer and PowerScribe 360.

Shotgun Ninjas Productions, LLC. | Founder / Systems Architect

- Architected the OperatorOS ecosystem and modular SaaS platform concepts for MSP operations, healthcare coordination, automation, diagnostics, and business workflows.
- Designed scalable product architectures integrating AI-assisted workflows, automation systems, and operational tooling.
- Led technical strategy, workflow planning, UI/UX direction, and automation-driven product design initiatives.

Prior MSP, Healthcare, and Commercial IT Roles

- Managed enterprise infrastructure, networking, communications systems, server administration, endpoint deployments, and business continuity operations.

- Implemented and supported VoIP/PBX systems, structured cabling, wireless infrastructure, workstation deployments, and server migrations.
- Developed strong operational troubleshooting skills across infrastructure, security, networking, and endpoint environments.

Core Strengths

Operational Automation • Enterprise Infrastructure • Healthcare IT • Technical Leadership • Escalation Engineering • Security Awareness • Documentation & SOP Development • Client Communication • Infrastructure Troubleshooting • Multi-Site Operations
